

Robert Jacobson M.D.  
Mayo Clinic Children's Center  
Vaccines transcript

**Dr. Robert Jacobson back-to-school vaccines SOT (:16)**

“Know whether or not you and your children are up to date on vaccines. Take the time to look at their records and either work with the state health department or your clinician to make sure your child has the vaccines, that you've had the vaccine that you are to get.”

**Dr. Robert Jacobson back-to-school vaccines SOT (:16)**

“A lot of us have lost our memory and understanding of the very diseases that these vaccines are directed against. We shouldn't be lulled into a false sense of complacency.”

**Dr. Robert Jacobson vaccines for college students (:24)**

“All through the four years of college parents need to make sure their teen or young college student is getting the vaccine as soon as it becomes available in the fall. In some parts of the country waiting until the child gets home for Thanksgiving break is not good enough. Because in some parts of the country they've already had it fly come through their community so it needs to be timed before they become at risk.”

**Dr. Robert Jacobson College kids/vaccines SOT (:12)**

“Flu can wipe out a college club sport, it can wipe out a dormitory corridor. It can ruin midterms or final time so parents need to get that annual flu vaccine in their college student.”

**Dr. Robert Jacobson lists vaccines natsot/broll (:14)**

“Hepatitis B, polio, haemophilus influenza, diphtheria, tetanus, pertussis, meningococcal vaccine, a combination vaccines like penicillin, the Hepatitis A, the human papilloma virus vaccine and TDap, the pneumococcal vaccine.”
