

Mayo Clinic Minute

Hands-on Medical Seminar

VIDEO	AUDIO
	<i>Bee Gees: Stayin' Alive. Ah, ah, ah, ah</i>
	So, we need to beat to that.
	<i>Bee Gees: Ah, ah, ah, ah. Stayin' Alive.</i>
Title: JACOB WILSON STUDENT	... just kind of keep going to the beat. And you want to press two inches deep into his chest.
	Jacob's right: two inches deep, and 100 beats per minute,
	How we doing?
	exactly the information Dr. David Farley hopes will stick.
Title: DAVID FARLEY, M.D. SURGEON / SEMINAR MENTOR Mayo Clinic College of Medicine	Some of these kids will be allowed to save a life that way.
	Besides how-to's on CPR and defibrillator use, Dr. Farley and a team of Mayo Clinic residents and fellows designed this seminar to inspire thinking about careers in medicine.
	They gravitate to hands-on stuff.
	So, these high schoolers are closing wounds
	Yes, you got it.
	and tying sutures.
	She's a master surgeon.
	They're even test-driving ultrasound machines.
	They like moving the, the colored candies off the pegs. They like CPR. They like getting feedback.
	And it's fun to see kids gravitate to it.
Title: BRIE ADAMS STUDENT	I want to do something in the medical field when I get older; I just don't know what. So, this might help me figure out what I want to do.
	<i>Bee Gees: Stayin' Alive.</i>
	Now, that's music to Dr. Farley's ears.
	<i>Bee Gees: Stayin' Alive, Stayin' Alive.</i>
