Mayo Clinic is leveraging data and technology to bring answers to patients everywhere.

- Supported by advances in Mayo Clinic Platform, between 15–20% of our patient visits are virtual at any given time. Virtual care is expanding to emergency medicine, ICU and neonatology, providing real-time expertise from our Mayo Clinic sites to local health care professionals caring for critically ill patients, such as rural hospitals across the Midwest.
- The number of patients served through Mayo Clinic remote care offerings, including Advanced Care at Home and Care Hotel, doubled in 2022 to more than 2,400.
- Over 12,500 patients were enrolled in remote patient monitoring and interactive care plans.
- Nearly 5 million patients initiated secure messages with their health care team through Mayo Clinic's Patient Online Services.
- Over 1 million patients self-scheduled their appointments through digital tools.

Mayo Clinic is positioned to lead the transformation of health care.

- While many health care organizations posted losses in 2022, Mayo Clinic earned a mission-sustaining 3.7% margin, which will be reinvested to support its Bold. Forward. strategy to Cure, Connect and Transform health care.
